

Leadership

Wildgeese Leadership is based on the belief that everyone has the potential to grow personally and professionally. Just like geese migrating in a V formation, good leaders know when to lead from the front, when to let others step up and how to encourage and support their team to maximise output and go further.

Using a mix of; theory, research, experience, games, practical exercises and examples, we develop leaders and managers enabling you and your team to realise your potential and fly.

Just some of our methods and tools include:

- Focusing on self--awareness and increasing understanding of your personal impact
- Exploring leadership styles from a practical and theoretical perspective and their place in different situations and contexts.
- Assessing team dynamics and exploring what influences productivity and growth
- Identifying and setting personal and professional vision, goals and objectives
- Looking at your core values and ethics and how they show up in all you do
- Pinpointing the importance of trust and how to build, rebuild and retain team trust
- Providing practical tools for better decision making and problem solving
- Exploring how to motivate yourself and others
- Learning how to have those 'difficult conversations' and achieve a positive outcome
- Focusing on Personal Resilience and how to support others
- Valuing diversity and difference and understanding unconscious bias and its' impact

Please get in touch if you would like more information, or to book one of our programmes.
